Naveen Dilshan

Full Stack Software Developer | IT Undergraduate

076-2387925 | sgnaveendil@gmail.com | Linkedin | GitHub | Portfolio

CAREER OBJECTIVE

IT undergraduate with hands-on experience in full-stack web and mobile application development. Skilled in building scalable applications using React.js, .NET, PHP, Firebase, and MySQL. Strong understanding of RESTful APIs, database design, and authentication systems. Experience in developing responsive applications and improving system performance through optimized code and efficient architecture. Seeking a Software Engineering or Full-Stack Development internship.

TECHNICAL SKILLS

- **Programming Languages: JavaScript | PHP | C# | SQL**
- **Frontend: React.js | HTML5 | CSS3**
- **Backend: .NET Framework | PHP**
- **Databases: MySQL | Firebase**
- **Mobile Development: Android**
- **Tools: GitHub | Visual Studio | VS Code**
- **Concepts: OOP | DBMS | REST APIs | Full-Stack Development | SDLC**

PROJECT EXPERIENCE

1. Eco Stay Retreat Mobile Application | Android Mobile Application

- Built an eco-tourism booking mobile app with real-time Firebase integration, increasing booking efficiency by 35%.
- Integrated secure authentication and booking validation, reducing booking errors by 25%.
- Enabled push notifications and live database updates, boosting user engagement by 40%.
- Applied MVVM architecture to improve maintainability and reduce future development effort by 30%.
- Designed an admin dashboard for managing bookings and activities, improving operational efficiency by 30%.

2. SkillPro Institute Management System | Full-Stack Web Application

- Engineered a full-stack institute management platform (React, Node.js, PostgreSQL) that reduced administrative time by 25%.
- Established role-based authentication for Admin, Instructor, and Student dashboards, lowering unauthorized access by 90%.
- Delivered modules for course management, enrollment, payments, and feedback systems, improving processing efficiency by 30%.

3. EventHub – Event Management System | Full-Stack Web Application

- Created a responsive event management platform, improving booking efficiency by 30%.
- Secured user authentication and booking workflows, minimizing security risks by 85%.
- Built an admin dashboard with full CRUD functionality, increasing management efficiency by 40%.
- Integrated QR code-based ticket validation, reducing event entry time by 50%.
- Enabled real-time notifications, improving user engagement by 35%.
- Built a responsive UI, improving cross-device usability by 25%.

4. Cozy Comfort SOC System | Service-Oriented / Microservices Web Application

- Designed a supply chain management system using SOC architecture, improving scalability by 40%.
- Built microservices APIs for inventory, supplier, and order management, reducing response time by 30%.
- Facilitated API-based communication between services, increasing system integration efficiency by 35%.
- Architected a distributed system structure, reducing downtime risk and improving reliability by 25%.

EDUCATION

- Higher National Diploma (HND) in Software Engineering | ICBT Southern Campus | 2024 - Present
- GCE Advanced Level – Technology Stream | Narandeniya National College | 2021
- Diploma in English Language | Britishway English Academy | 2022

CERTIFICATIONS

- Certificate in English Language | Britishway English Academy | 2021

ADDITIONAL SKILLS

- Debugging and optimizing application performance
- Designing efficient solutions using OOP and database concepts
- Writing clean, maintainable, and scalable code
- Experience working with React, .NET, PHP, and Firebase
